)F		SUPPLEMENT TO REPORT NO. 25.
united 19 ard Creent Cy Law	B IN ART MANNER TO AS URBUTGORIZED PERSON IS PRO-	UNEVALUATED INFORMATION 25
	1b	
4	Location	imaka Donda, da kha wasabasha
1.5	The factory is located at Pervomaisk in the Do of Sokoloyarovka (sic).	oners masin, in the vicinity
	Description	
2.	The factory existed before the war and shows t	races of reconstruction.
	Direc ws	
3.		
_J. ₉	The factory managers are Savelin and Lokhov, t is chief director.	out it is not known which one
26		out it is not known which one
Jo	is chief director.	bas region.
	is chief director. Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which wer	bas region. re shipped from the factory,
	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which wer destination unknown. Equipment all electric	bas region. re shipped from the factory, 25 ic motor parts, from cylinder
40	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which wer destination unknown. Equipment all electric blocks to the smallest coils, were produced with	bas region. re shipped from the factory, 25 ic motor parts, from cylinder ithin the factory. 2 tory is equipped with machinery
40	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which wer destination unknown. Equipment all electric blocks to the smallest coils, were produced with the fact from the Elektromotorenwerke Ebert / Dresden,	bas region. re shipped from the factory, 25 ic motor parts, from cylinder ithin the factory. 2 tory is equipped with machinery
40	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which were destination unknown. Equipment all electric blocks to the smallest coils, were produced with the form the Elektromotorenwerke Ebert / Dresden, led there in spring 1946. Labor	tory is equipped to have been instal-
5.	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which wer destination unknown. Equipment all electri blocks to the smallest coils, were produced wi from the Elektromotorenwerke Ebert / Dresden, led there in spring 1946.	tory is equipped to have been instal-
5.	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which were destination unknown. Equipment all electric blocks to the smallest coils, were produced with the from the Elektromotorenwerke Ebert / Dresden, led there in spring 1946. Labor iork is carried out in two shifts with approximate the statement of the smallest coils and the statement of the fact of the smallest coils are produced with the smallest coils and the statement of the smallest coils are produced with the smallest coils.	the shipped from the factory, 25 10 motor parts, from cylinder ithin the factory. 21 22 25 26 27 26 27 28 28 28 29 29 20 20 20 20 20 20 20 20
4.o	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which wer destination unknown. Equipment all electric blocks to the smallest coils, were produced with from the Elektromotorenwerke Ebert / Dresden, led there in spring 1946. Labor Fork is carried out in two shifts with approximate of the product of the province of the province of the proximate of	thas region. re shipped from the factory, ic motor parts, from cylinder ithin the factory. tory is equipped with machinery believed to have been instal— imately 600 workers per shift. ately 2½ m high. Factory guards at the entrances.
5. 6.	Production a. Electric motors for coal mines in the Donk b. Various iron and steel castings, which wer destination unknown. Equipment all electric blocks to the smallest coils, were produced with from the Elektromotorenwerke Ebert / Dresden, led there in spring 1946. Labor fork is carried out in two shifts with approximate armed men and women. Passes are checked as 25 YEAR RE-REVIE CLASSIFICATION SACRAT/CONTROL_US OF	thas region.
